

Thank you for visiting Workplace Drug website.

So far, we have captured 6 seconds of your valuable time, and we probably should get to the point.

As you can see from the subject line, the topic is Workplace Drug and we are in the business of making potential clients think.

Think?

Yes, think about the impact of drug use and abuse on your employees' health and morale.
How much does drug use affect your company profitability and image?

You probably don't know, but you do care. In fact, the Health and Safety at Work Act gives you and your management team a duty of care.

If your current Employee Manual specifies your requirement to test and you are not testing, then contact us to discuss the best type of programme to meet your needs.

If you need help and inputs on how to gauge the present situation and draw up a policy, we are here to help.

To help you assess this impact we have worked with industrial psychologists at the University York to create a unique Workplace Drug Self-Assessment Appraisal (WDSAA) and there is a link to an example below. 10 simple questions, requiring less than 3 minutes to complete. Circulated to the site or department of your choice by you.

Anonymous, confidential summary data and report is sent to you. The WDSAA is unique to your company, and gives you an insight on

how your employees feel about the impact of drug and alcohol use in their work environs.

Fundamentally, if 3% of the UK workforce are taking illicit drugs on a regular basis, would you not rather these workers are employed by your competition?

If you would like to review the survey material, please contact us.
